VIOLENT DEATH IN NORTH CAROLINA: DURHAM COUNTY INCIDENTS, 2008-2017

The North Carolina Violent Death Reporting System (NC-VDRS) is a CDC-funded statewide surveillance system that collects detailed information on deaths that occur in North Carolina resulting from violence: homicide, suicide, unintentional firearm deaths, legal intervention and deaths for which intent could not be determined. NC-VDRS is a multi-source system that gathers information from death certificates, medical examiner reports and law enforcement reports. The goal of this system is to aid researchers, legislators, and community interest groups in the development of public health prevention strategies to reduce violent deaths. All deaths reported in this document are based on location of occurrence rather than residence and, instead of a rate, the ocurrent ratio is reported. This statistic is derived from the total number of violent deaths resulting from injuries in a specified geographic region divided by the number of residents in this region. This document summarizes all fatal injuries from violence that occurred in Durham County for the years 2008-2017.

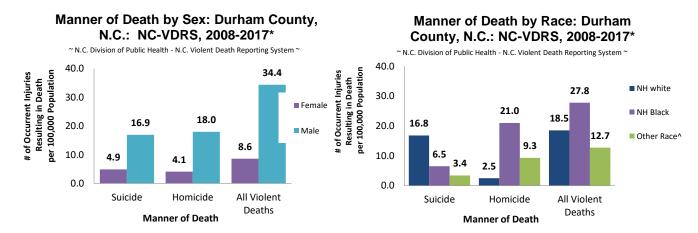

• For the years 2008-2017, there were 599 violent deaths from injuries sustained in Durham County. Of these 599 deaths, 588 were N.C. residents (98.2%) and 533 were Durham County residents (89.0%).

• There were 262 suicides (43.7%), 308 homicides (51.4%), 1 unintentional firearm death (0.2%), 11 deaths from legal intervention (1.8%) and 17 deaths of undetermined intent (2.8%).

• In Durham County, the suicide ratio was 3.4 times higher in males than females, and the homicide ratio was 4.4 times higher in males than in females.

• Patterns of suicide and homicide differed by race. Suicide victims were more likely to be Non-Hispanic white than NH black. NH whites had 16.8 suicides per 100,000 population versus 6.5 suicides per 100,000 population in NH blacks. All other racial groups combined had 14 suicides.

• In contrast, NH blacks had 21.0 homicides per 100,000 population as opposed to NH whites who had 2.5 homicides per 100,000 population. All other racial groups combined had 49 homicides.

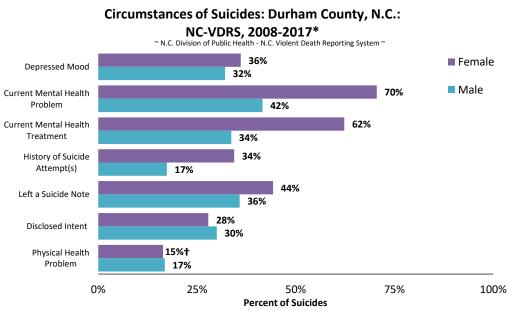

^Other race refers to Hispanics, American Indians, Asians, other races, and unspecified or unknown race.

^{*}Based on the county of injury occurrence.

• Suicides and homicides displayed dissimilar age patterns. Homicides peaked among those 20-24 with 25.7 homicides per 100,000, where suicides peaked among those 85 and older with 16.3 suicides per 100,000.

- The majority of homicides (80.5%) and less than half of suicides (41.2%) were committed using firearms.
- Suspicion of intoxication was reported in 15.3% of homicides and 22.1% of suicides.

• For homicide incidents where one or more suspects were identified, the relationship of the victim to the suspect was known (current or former spouse/boyfriend/girlfriend, family, friend or acquaintance) more frequently for female (79.7%) than male (46.9%) victims.

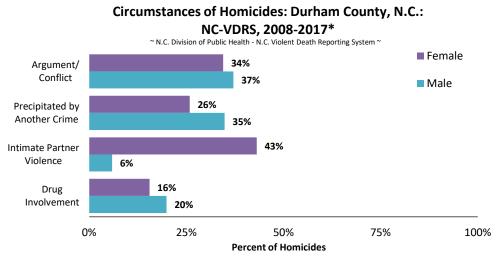

• 32.1% of male and 36.1% of female Durham County suicide victims with circumstance information were characterized as being currently depressed when they completed suicide.

• 70.5% of female and 41.6% of male suicide victims were characterized as having a current mental health problem.

• Females (34.4%) were more likely to have attempted suicide in the past as compared to males (17.4%).

*Based on the county of injury occurrence. 95.8% of cases had circumstance information. 4 females and 8 males were missing circumstance information. †There were less than or equal to 5 deaths

• Arguments or conflicts were more likely to be a contributing factor for male homicides (37.1%) than for female homicides (34.5%).

• 25.9% of female homicides and 34.8% of male homicides were precipitated by another crime such as robbery, burglary or drug trafficking.

• Intimate partner violence was a contributing factor in 43.1% of female homicides, but only 5.9% of male homicides.

*Based on the county of injury occurrence. 90.6% of cases had circumstance information. 26 males and 3 females were missing circumstance information. †There were less than or equal to 5 deaths

The North Carolina Violent Death Reporting System is supported by Cooperative Agreement 5NU17/CE002613-05-00 from the Centers for Disease Control and Prevention (CDC).
